Anna Kostyrko

Node.js Developer, remote

I am Node.js Developer with strong soft skills which I have gotten for 5 years of work as a manager. Now, I have a goal to become a Team Lead in 4-5 years.

I would like to be a part of a big team and participate in creating absorbing projects.
I see myself as a performing employee in a well-run company.

Experience

Junior Node.js Developer

Ukrainian startup in restaurant service domain — June 2023 - present

Responsibilities:

- Worked with requirements and clarified them with BA
- Development system, which consists of 3 main services
- Setuped system from scratch with project configuration
- Designed REST API and database schema according to feature requirements
- Supported database changes with migration and seeders
- Implemented REST API endpoints with Swagger documentation
- Uploaded files and saved them in Google Cloud Storage
- Followed code style and linters during the development
- Tested with Postman
- Worked in collaboration with Frontend and QA team
- Followed Kanban with Trello
- Used Gitflow model for development process

Technologies used: Nest.js/Typescript, OOP, JWT, TypeORM, MySQL, Swagger, Postman, Docker, Google Cloud, Eslint, Prettier

Trainee Node.js Developer

Self-education and Mentor program — September 2022 - present

① **Pet project**: realized the features of Instagram on Nest.js (link to GitHub)
② **Pet project** of a user management system that can create users with avatars and view users with paginated lists (link to GitHub)

Technologies used: Nest.js/Typescript, OOP, JWT, TypeORM, PostgreSQL, Swagger, Node.js streams, Postman

Also, solving problems based on arrays and databases on Leetcode
